PROFESSIONAL SUMMARY

Full Stack Software Developer (MERN) with strong JavaScript fundamentals and deep understanding of Data Structures & Algorithms. Experienced in building scalable, real-time applications with secure authentication, optimized database queries, and clean API architecture. 4.0 GPA graduate of UC Berkeley Extension. Seeking an entry-level Software Engineer role where I can contribute to production systems and grow within a high-performing engineering team.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3

Frontend: React, Context API, Responsive Design

Backend: Node.js, Express, REST APIs, Apollo GraphQL, Socket.IO

Databases: MongoDB, MySQL

Concepts: Data Structures & Algorithms, OOP, MVC Architecture, Big-O Optimization

Tools: Git, GitHub, Postman, MongoDB Atlas, Render

PROJECT EXPERIENCE

Real-Time MERN Chat Application

Tech: React, Node.js, Express, MongoDB, Socket.IO

- Designed and implemented a real-time messaging system using WebSocket architecture enabling instant bidirectional communication.
- Engineered room-based event broadcasting to ensure messages are delivered only to relevant participants.
- Built notification logic using isSeen flags and presence detection to prevent unnecessary alerts.
- Implemented rate-limiting and message-length constraints to improve system stability.
- Optimized MongoDB queries and indexing strategies for faster message retrieval.

BrewTip – Full-Stack Tipping Platform

Tech: React, Node.js, Express, MongoDB, Apollo Server, Stripe API

- Developed and deployed a full-stack MERN application enabling secure cashless tipping.
- Architected GraphQL backend with Apollo Server for efficient structured data fetching.
- Integrated Stripe Checkout and implemented JWT-based authentication with protected routes.
- Designed modular APIs and optimized database queries for scalable performance.

E-Shop – E-Commerce Storefront

Tech: React, Redux, Node.js, Express, MongoDB, Stripe

- Built full-stack e-commerce platform with dynamic product browsing and cart management.
- Implemented Redux for centralized state management and predictable UI updates.
- Developed secure authentication using bcrypt and JWT session handling.
- Integrated Stripe payment processing to simulate end-to-end purchase workflows.

PROFESSIONAL EXPERIENCE

Banker – Wells Fargo | San Jose, CA (07/2024 – Present)

- Manage complex financial transactions with high accuracy and strict regulatory compliance.
- Analyze client needs and recommend tailored solutions, strengthening analytical skills.
- Mitigate operational and fraud risks through careful transaction monitoring.

Bank Teller – Wells Fargo | San Jose, CA (12/2019 – 07/2024)

- Processed high-volume financial transactions while maintaining balanced cash controls.
- Identified potential risks and escalated issues in compliance with security regulations.

Assistant Store Manager – Daiso Japan | San Jose, CA (04/2015 – 12/2019)

- Supervised daily operations, inventory management, and merchandising execution.
- Improved customer satisfaction through service optimization and team coordination.

EDUCATION

Certificate in Full Stack Web Development (GPA: 4.0) – UC Berkeley Extension (2024)

Coursework in Website Programming – California State University, East Bay

Associate Degree in Programming and Networking – De Anza College
